

DESIGNED TO SPEC. BACKED BY STRENGTH.

WHAT IS STRATUS SERIES?

A custom loose material framing solution; a complete stud & track system made from galvanised, heavy-gauge steel.

It's holistically designed with project-specific engineering to meet seismic, deflection and wind load requirements.

Stratus Series offers a flexible, ready-to-use solution that makes installation easy, improves efficiency, and provides a stronger option, all backed by expert design advice.

IDEAL FOR:

- ✓ Healthcare
- ✓ Commercial
- ✓ Retail
- ✓ Service Stations
- ✓ Education
- ✓ Residential Complexes

Holistic Design Solution

Job specific design & engineering advice.

Heavy Gauge Materials

Thicker steel for strength and durability.

Zinc Coating Flexibility

Prevents damage during handling, ensuring long-term protection.

Higher Tensile

Minimum G450, improves structural integrity & minimises deflection.

Flexible Sizes

Large profiles available for increased structural capacity.

Consistent Quality

Reliable quality and profiles you can count on—every delivery, every project.
